

64th Anniversary Canadian Confederation Observed Throughout Crows Nest Pass

Coleman Represented by Baseball Teams at Blairmore and Fernie—Caledonian Society Hold Picnic, Also Canadian Labor Defence League—All Resorts Well Patronized

Canada's 64th anniversary of the founding of Confederation, was celebrated in the Crows Nest Pass by sports days in Fernie and Blairmore. Pincher Creek also had a sports day. Some went to Waterton Park for the holiday, and the populace was fairly well divided over the various places.

Fernie, having the air circus of half a dozen planes, attracted the most people from Coleman. At Crows Nest Lake the Caledonian Society picnic was attended by a big crowd, and also the Canadian Labor Defence League held a picnic and sports, which was attended by some from Blairmore and Bellevue.

Coleman baseball teams were not in the winning streak on the holiday, for the regular team was defeated by Bellevue 8-1. Atkinson and Kapalka were off their form. Bushtown was defeated by Blairmore by 16-5. Todd Creek and Hillcrest were among the competing teams, play being run over to Thursday.

At Fernie, Angelo Gentile with a team of hand picked players, some from the Pass and some from Spokane, had great hopes of taking the first prize, but his team had the same fate as the "home-brews" at Blairmore. They put up a brilliant battle, there being no score

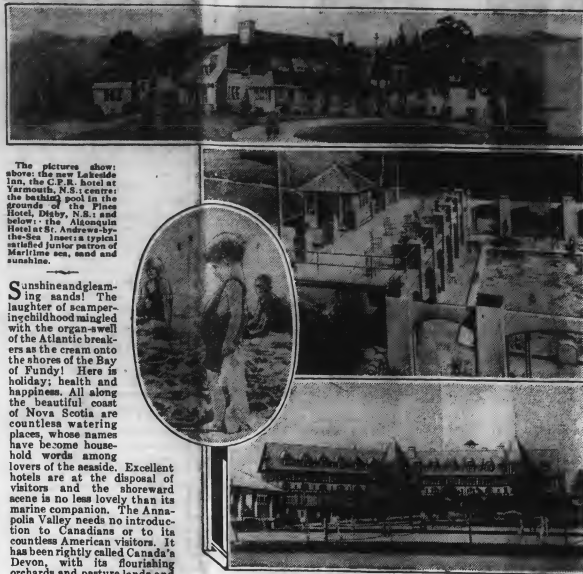

at the end of the ninth inning. Two extra innings were played, Fernie scoring two runs in the eleventh and winning the game. The Spokane man catching for Coleman broke his finger in the third inning, which handicapped their chances. It was one of the most thrilling games played at Fernie for a long time. "Bill" Gate took the crippled catcher's place.

The marathon race at Blairmore (five miles) was won by Fournier, running the five miles in 28 minutes. Connors was second and Goodwin third. The race was run on the new quarter mile track.

At Coleman Frank Barringham had promoted what promised to be the best light weight boxing match yet staged. Jimmy Burrell and Kid Hughes had both trained in expectancy of a keen battle with good support, but attractions in other towns throughout the Pass and so many people being away till late in the evening cut down the attendance at the opera house, where the exhibition was to have been held, therefore the management decided to cancel the match, rather than face a much heavier deficit than that entailed.

Fine weather throughout the day favored the holiday, making it ideal.

SUMMER IN THE MARITIMES

The pictures show: above, the new Lakeside Inn, the C.P.R. hotel at Yarmouth, N.S.; centre, the bathing pool in the grounds of the Pines Hotel, Digby, N.S.; and below, the Alexander Hotel at St. Andrews-by-the-Sea. (Inset is typical sculleryed further patron of Maritime sea, sand and sunshine.)

Sunshine and gleaming sands! The laughter of scampers-in-childhood mingled with the organ-swell of the Atlantic breakers at the crest onto the shores of the Bay of Fundy! Here in holiday, health and happiness. All along the beautiful coast of Nova Scotia are countless watering places, whose names have become household words among lovers of the seaside. Excellent hotels are at the disposal of visitors and the shoreward scene is no less lovely than its marine companion. The Annapolis Valley needs no introduction to Canadians or to its countless American visitors. It has been rightly called Canada's Devon, with its flourishing orchards and pasture lands and its countless picturesque farms and hamlets. A few hours' journey by palatial steamer from Saint John, N.B., Digby, with its Pines Hotel as the hub of activity, rivals Kentville with its Cornwallis Inn, and Yarmouth with its new Lakeside Inn, in extending hospitality to the holiday-seeker. Golf, tennis, bathing, fishing, yachting and innumerable beautiful motor drives are only a few of the recreations available. On the New Brunswick mainland, farther, as it were, to this staid family, the Algonquin Hotel, at St. Andrews-by-the-Sea, sets a standard of summing untravelling anywhere on the continent. The luxurious hotel, with its many attached cottages, is the centre of one of the most sought after championship courses available, are met on a scale of the home of the royal and ancient game in old Scotland. The Canadian Pacific Railway places all these resorts within easy access of their many devotees.

Caledonian Society Enjoyable Picnic on Dominion Day

Fine Day's Outing and Sports Amid Beauties of Grounds at Crows Nest Lake

The Caledonian Society held their first annual picnic and sports on Dominion Day at Crows Nest Lake. The weather man being kindly disposed by providing an ideal day, everyone participating enjoyed themselves to the utmost, especially the children, for whom the picnic was primarily arranged.

Wednesday's success ensures that it will be an annual event much looked forward to. D. Gillespie welcomed the party and spoke on the significance of the day to loyal Canadians who upheld the constitution and the laws of the land instead of seeking to tear down and substitute strange doctrines.

The executive takes this opportunity of expressing appreciation to those who kindly placed their cars at the society's disposal for conveying the party to and from the lake.

The list of prize winners is held over till next week.

First Class Honors for Grace McKinnon

Congratulations are in order to Miss Grace McKinnon, daughter of Mr. and Mrs. Chas. W. McKinnon, who on completion of her first year at the Macdonald Institute at Guelph, Ontario, was awarded first class honors in all subjects. She is a former pupil of Coleman high school, and her accomplishment gives great satisfaction to her school friends as well as her parents.

Mr. and Mrs. John Gray of Westville, N.S., are visiting Mrs. W. G. Fraser, Sixth street.

Examinations in Music

Examinations were held at the residence of W. J. Harris, by D.J. Jennings, Mus. Doc., L. Mus., L.C.M., F.G.O.M., internationally known as an organist, composer and critic. Successful candidates are as follows:

First class pass, Grade 1—F. Andrews, Amy Harrison, David Jones, Herbert LeRoy, Glyn Fisher, Lily Padgett. Grade 2—Chas. Rayman, Betty Winstanley.

Honors—Tom Hill 6, Alfred Moores 4, Kenneth Owen 4, Oliver Winstanley 3, Albert Horrocks 2. The above exams include Theory as well as practical.

Special mention is made of Alfred Moores, who has covered successfully Grades 3 and 4 in one year.

Albert Horrocks wins a silver medal for highest marks, making 94 per cent.

Oliver Winstanley was awarded silver medal for violin solo under 13 years at the B.C. festival.

Kenneth Owen won the open solo gold medal at the B.C. festival, being his fourth medal in three years.

High School Dance

Many of Coleman's young people enjoyed a pleasant evening on Monday at a dance given by the high school literary society in the Oldfellows hall. Gladys Higginbotham, president of the literary society, presented each of the high school staff, Mr. Hoyle, Miss Houston and Miss Beale L. Dunlop, with an enlarged picture of Crows Nest mountain. The remainder of the evening was spent in dancing. Mrs. Altmatt's orchestra providing the music.

Miss Beale L. Dunlop will spend the school vacation at Vancouver, with her sister Helen, of Calgary high school staff. Prior to going to the coast she will spend two weeks at Edmonton marking examination papers.

Coleman Homing Society

Coleman Homing Society had 31 pigeons entered in its weekly flight, the course being from Billings, Montana, airline distance of 385 miles.

Birds were released at 7.30 a. m. Sunday, and the first reached Coleman at 7.30 that evening.

Results: yards per minute
J. Anderson 941.80
W. Roushead 878.660
W. Pryde 691.20
C. Makin 680.9
J. Anderson 675.2
J. Anderson 675.2
A. Dewar 672
J. Sudworth 670

Only two birds returned on Sunday, the rest arrived early Monday morning, from 6.30 a. m. onward.

Prizes were a sack of maple peas donated by Ed. Ledieu, and a flashlight donated by Mr. Alex. Morrison.

ST. ALBAN'S CHURCH

Sun. July 5, the fifth after Trinity, services will be—Sunday school 9.30 a. m. Sunday school; 7 p. m., evensong and sermon.

The Canadian Church Army Crusade of Witness will be held in Blairmore and Coleman from July 20 to 26. Captain Bewley will be in charge. This will be a real evangelic mission. The Canadian Church Army is a branch of the English Church Army, founded by Prebendary Carlile, and its members are engaged in social service and institutional work throughout the Dominion. Men, women and children are invited to the meetings.

Thomas Clarke, of Macleod, an old-timer of the mounted police, was here on Thursday visiting his son, Tommy Clarke, forest ranger. He was accompanied by his son, R. G. Clarke, of the Alberta provincial police, Lethbridge, and they left on Friday for a holiday at Waterton Lakes Park.

Carmangay Bank Employee Shot Accidentally

John Downie, acting cashier at the Canadian Bank of Commerce, at Carmangay, was shot through the groin when the gun in the drawer of the cashier's cage discharged. It appears that Downie reached into the drawer for a handkerchief, which act discharged the gun, the bullet entering his body. His injuries are not serious. The circumstances point to the shooting being purely accidental. Mr. J. Downie was formerly on the bank staff at Coleman.

Local News

The Misses Ethel and Margaret Dunlop and Miss Jean Pattinson will attend summer school at Edmonton for six weeks.

The big comedy sensation of the year is Harold Lloyd in "Feet First" at the Palace theatre. It's a heart quaking, sky high romance.

Frank Celli attended the funeral of a neighbor at Creston on Monday, being Mrs. Truscott, who formerly lived in Coleman, her husband working at McGillivray mine.

The names of all soldiers who died or were killed during the war, who belonged to Coleman, are required by the war memorial committee. Names should be written plainly and mailed to Peter Smith, secretary of war memorial committee.

Calgary exhibition and stamped July 6 to 11 will be the greatest combined exhibition and old time celebration ever held in the west. The exhibition will include over 9,000 entries, and the attractions and special features are the best ever arranged for. The greatest interest is being taken in the 75th birthday celebration of Mr. P. Burns, Alberta's leading stockman, which takes place on the opening day of the exhibition.

Parks Commissioner Visits District

On Thursday Horace L. Seymour, of the provincial parks commission, and W. E. Zinkin, civil engineer, of the office of the director of town planning, Edmonton, were conferring with the local council regarding the park site at the lake and other matters pertaining to town planning. A special meeting of the council was called, following which a visit was made to the lake. May or Moores suggested that the town relinquish its interest in the park site at Crows Nest Lake and this will be considered by the parks commission.

It is likely further action will be taken but owing to very limited appropriation this year for park purposes, it is not expected that any development will be undertaken this year. G. Kallock suggested it would be a good plan to have work started as unemployment relief at the lake site, and urged that this be considered by the proper department in Edmonton.

In the evening Mr. Seymour and Mr. Zinkin interviewed Mayor Farmer at Blairmore and G. E. Cruickshank, M. L. A., at Hillcrest. They expect to make a visit here later in the summer to discuss various matters pertaining to town planning and the park site.

Then She "Balked!"

Mayor Moores invited the parks commissioner for a ride in the "Ramblor" on Crows Nest Lake. The party, including several members of the council and the president of the Board of Trade, got "all set" for the trip. It began to rain, but this did not deter the party. Then, after getting started, the engine began to splutter till after a few desperate efforts it died, the launch was rowed back to the boathouse and the excursion was nipped in the bud at a most inopportune time. The party viewed the lake by resuming the cars. The "Ramblor" refused to ramble.

Nationalism vs. Internationalism

This old world is in a state of confusion worse confounded. Everywhere acute problems of one kind or another demand solutions. And almost everybody has some pet theory or plan to advance as a sure cure-all, but upon analysis they are found to be impractical and more likely than not to create greater problems and difficulties rather than solve existing ones. People's thinking appears to be muddled.

Like hundreds of others, the writer of this column has for months past been reading reports of debates in various parliaments, speeches and interviews by public men, by economists, by financiers, by transportation executives, resolutions by the hundreds passed by political conventions, farmers' meetings, manufacturers' bodies, church assemblies, and what not. He has read voluminous articles on Russia's "Five-Year Plan," on banking and currency, on trade and tariffs, on unemployment and underconsumption, on over-production and under-consumption, war debts and war reparations.

And with what result? Just this, and it is passed on to the readers of this column for what it is worth. The conclusion reached is that the world is at war today just as truly as it was during the years 1914-1918, and that all people are suffering because of this warfare, just as they suffered in the years mentioned. The war of today is not between opposing armies and navies, but between two sharply antagonistic ideas—an acute nationalism on the one hand and a reaching out for an acceptance of the true concept of internationalism on the other hand.

Following the Great War, the statesmen of the world attempted to promote and make realities of two great ideas—one, the right of self-determination by races and small nations; two, the creation of a League of Nations. Both of these ideas are good, but either carried to an extreme is destructive of the other.

In order to provide for the first, self-determination, numerous small nations were brought into being in Europe. They immediately set to work to fan the flame of nationalism as essential to their continued existence and development, and the fanning of such flames was comparatively easy following four war years of nationalistic appeals to people in all lands. The inevitable result was the setting up of barriers of various kinds along all frontier lines, all with the idea of building up a nation apart from other nations.

Coupled with this development was the effort made in the opposite direction—the creation of a League of Nations to draw all nations closer together, to preach the doctrine and drive home the lesson taught by the Great War that no nation can live unto itself alone, that interdependence rather than isolation and antagonism is essential to the wellbeing of the human family.

Unfortunately, the appeal to a narrow nationalism found a reader response. The masses of the people understood such an appeal. They had been fed on it for countless centuries and as a result were imbued with prejudices and passions not easily dispelled. Selfish interested parties and individuals utilized this nationalistic appeal to their own advantage. The result—a world presently given over to the most insane forms of nationalism. World trade, the exchange of commodities between nations, is curtailed and restricted by tariff walls higher than ever before known; restrictive laws are rigidly enforced prohibiting the people of one country to enter another, with the result that the unpopulated areas of the world remain unpopulated and unproductive while teeming millions are coupled up in restricted areas with no outlet; producers in one country cannot find customers for their surplus products, while consumers in other countries lack even the essentials of a bare existence.

Faced with such a condition—a condition everywhere recognized—the nations of the world instead of getting together and mutually agreeing in the interests of all to abandon this extreme nationalism, remove their restrictions and destroy their barriers, and thus allow natural laws to freely operate, are actuated by fear that some one nation may thereby gain an advantage over some other nation. So all continue to suffer, and the situation grows worse and the ensuing struggle every new restrictive act by one country is met by a counter restrictive act by other countries.

So long as such a condition prevails, it is idle to talk of reduction in armaments, because physical warfare is the ultimate outcome of economic warfare and the continuing clash of nationalistic aspirations. In the development of a true internationalism lies the hope of the world.

Saskatchewan Honey

1930 Production Largest in History of Province

The production of honey in the Province of Saskatchewan, in 1930, was 685,551 pounds and its value \$108,257—the largest output in the history of the province and exceeding that of 1929 by 260,649 pounds and that of 1928 by 263,249 pounds. The honey production for the whole Dominion in 1930 was 31,169,686, so that Saskatchewan's quota was a little over two per cent. Manitoba produced 10,110,128 pounds and Alberta 1,578,948 pounds.

Employer Was Narrow-Minded

Harry Wheeler, grocery clerk of Havant, England, won a \$500 prize in the Derby Sweepstakes, but lost the job he had held for 42 years. He was bought a ticket under the pseudonym of "Jumbo" and gave the address of his employer, G. R. Standing, grocer, magistrate and lay preacher. When Standing, a strong opponent of gambling, heard of the incident, he promptly discharged Wheeler.

Gets Seven Months' Leave of Absence

Oklahoma Convict Let Out To Harvest Neighbors' Crops

Jim Crowell has been given seven months' "leave of absence" from the Oklahoma State Prison because he owns the only threshing machine in his part of the State. Crowell's neighbors petitioned Acting Governor Robert Burns to grant the leave because, they said, they had to have him to harvest their crops. The prisoner was serving a twelve-year sentence for manslaughter.

Edmonton Civic Census

The result of a civic census taken recently in Edmonton shows that the population of this city is 78,009. The census was taken on the same basis as the federal census, and shows an increase over the 1930 population of 1,192. Over the population, 61,336 reside on the North Side, and 17,723 on the South Side. A unique balance of the sexes is recorded, in that there are 39,540 males, and 38,519 females.

Suffered Severe, Painful Cramps In Her Stomach

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes: "I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Willington Arts Competition

Results Of Awards For The Third and First Year Announced

Results in the Willington arts competition for the third and final year were announced recently at Ottawa. The Willington arts competition was instituted by the Earl of Willington, when governor-general of Canada, with a view to the encouragement of the arts and letters in the Dominion. The music section called for a composition for violin and piano and this contest was won by George Bowles, of Winnipeg, with his "Impromptu."

The prize of \$100 for an organ composition was won by F. Llewellyn Harrison, New Glasgow, N.S., with his "Winter's Poem." The final prize in music, also of \$100, was won by Gladstone Evans, of Toronto, with his "Wanderer." This prize was offered for a vocal solo setting, with piano accompaniment of a poem chosen by the committee.

The prize of \$200 in the sculpture field was won by Diana Lauterman, Montreal, with "Head of an Indian Chief."

In the painting section, won by Pegi Nicol, of Ottawa, was her painting the "Log Cabin," the following submissions received honorable mention: "Lyttle Church, E.C." by J. W. MacDonald, Vancouver; "Ten," by F. H. Varley, A.R.C.A., Vancouver; "F. H. Varley, A.R.C.A., Vancouver," by F. H. Varley, A.R.C.A., Vancouver.

Using Movies To

Trace Brain's Action

Medical Convention Sees New Method For Scientific Study

A promising method of using movies to unravel mysteries of the brain's control over health was shown at the American Medical Association's annual convention in Philadelphia.

The pictures were taken during the last five years at the St. Elizabeth hospital at Washington, the government institution for the insane. But their application is not confined to insanity.

They record the peculiar facial expression and movements of patients who later died and whose brains now reveal the reasons for the troubles. The brains are mounted under glass in such a manner that the observer sees vividly the damage that expressed itself in action day after day.

By study of the pictures and the brains, physicians can recognize the earmarks of similar troubles in the living, and in some cases take action before it is too late. In other instances medicine now knows no remedy and the movies are simply a new method for scientific study.

Treasures Unearthed

By Veteran Explorer

Silk In British Museum Is Older Than Christianity

In the British Museum is some silk, the colors of which are bright and the patterns clear. Yet it is older than Christianity, having been found in a cache on the ancient high road between China and Eastern Asia, where it had been placed 2,000 years earlier. The finder was Sir Aurel Stein, the veteran explorer, who, it is announced, has been forced to abandon his latest expedition through Chinese obstruction. Most of his life Sir Aurel has been unearthing traces of bygone civilizations. But none probably surprised him more than the discovery he made not long ago in the heart of the desert east of Syria. There, far from the haunts of man, he found the tracks of a motor car! Following them up, he presently found the car, too. It was carrying a Bedouin sheik and three shepherds, who were using it expertly to search for lost sheep.

Vancouver Exhibition

Splendid progress is being made in the erection of new buildings by the Vancouver Exhibition Association which will run to an expenditure of about \$300,000 and will likely be completed during August.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Chinese Returns Home

A large party of Chinese, accompanied by their wives and families, arrived in Vancouver recently over the Canadian Northern Railway. Members of this party came from the British West Indies and South America and were en route to China.

Manitoba Beryllium Deposits

The Industrial Development Board of Manitoba, announces that it is at present in touch with about thirty United States firms in regard to the development of the beryllium deposits in Northern Manitoba.

U.S. Land, Sea and Air Forces

Figures Showing Strength Submitted To League By United States

Acting to encourage world-wide preparations for the League of Nations general disarmament conference, the United States government has submitted to the league after setting forth in detail the total land, sea and air forces of the United States.

The league has requested similar information from the other powers which will participate.

The United States total land effectives as given in the data, are 189,957, including 13,080 officers, as compared with a total strength for the army under the national defense act of 1923 of 177,000 officers, 640 warrant officers and 28,200 enlisted men.

The total naval force strength was placed at 109,888, including 10,420 officers of the line, 1,030 officers and 17,500 men of the marine corps and the marines were listed as of "average strength."

Recipes For This Week

(By Betty Barclay)

LEMON MERINGUE PIE

(Makes 1 pie)

1 cup sugar.
3 tablespoons flour.
3 tablespoons cornstarch.
1 teaspoon salt.
1½ cups boiling water.

Sift dry ingredients, add water, and cook in double boiler until thick (about 15 minutes). Add:

½ cup lemon juice.

Grated rind of 1 lemon.

2 egg yolks, beaten slightly.

Cook 2 minutes longer. Cool and turn into a baked pie shell. Cover with meringue made of:

½ cup whites.

¼ cup sugar.

¼ teaspoon baking powder.

Beat egg whites until frothy, add sugar and baking powder and continue beating until stiff. Put in moderate oven (325 degrees Fahrenheit) for 15 minutes to brown.

LISBON EGGS

This combination of soup and eggs makes a light hearty enough for the main course at luncheon or supper, or may be used as a beginning for an otherwise rather light dinner.

2 cups soup stock.

1 onion.

1 tablespoon vinegar.

1 tablespoon sugar.

2 tablespoons bacon drippings.

Eggs.

Fry the sliced onion in the bacon fat. Add the soup stock, vinegar, and sugar. Cook all together until the onion is soft. Have ready one slice of toast for each person to be served.

Put an egg in the boiling soup for each person. Arrange the toast on soup plates. Place a poached egg on slice. Fill the plates with the soup.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite charm. Add a subtle flush to the palest woman. Invaluable for softening the hands and making them gleefully white. Cool and refreshing. Daintily fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Decline In Construction

Building Figures In Canada Show Considerable Falling Off

A falling off in building construction in Canada was recorded for May. Building permits issued in 61 cities reporting to the Dominion Bureau of Statistics amounted to \$11,868,000 as against \$13,786,000 in April, and \$20,321,000 in May of last year. The total of the first five months of 1931 was \$49,001,000, the lowest figure in the past decade.

Of the larger cities, Montreal reported a higher total of building permits issued both in April, 1931, and in May 1930, while in Toronto, Winnipeg and Vancouver there was a decrease in both comparisons. St. Boniface and North Vancouver recorded increases in the value of the building authorized as compared with both the preceding month of the same months of last year.

Trout can be caught with worms on a bent pin but custom requires perfect co-ordination of mind and body and the use of \$300 worth of superfluous equipment.

W. N. U. 1896

British Plane Will

Carry Robot Pilot

When Fliers Try For Non-Stop Record To Cape Town

Squadron Leader O. R. Gayford and Flight Lieutenant P. L. G. Best have been chosen to attempt a world's long-distance record in a new giant monoplane on a non-stop flight to Cape Town or Ceylon.

A Fairley-Napier monoplane being built for the attempt will be ready about the end of July and will be tried out in August, although the attack on the record of 5,825 miles now held by the French airmen, Dieudonne Coste and Maurice Bellonte, will not be made until late autumn.

The destination will be determined by weather conditions, although the Ceylon route is regarded as more favorable for the attempt.

The machine will be almost identical with the Fairley-Napier long-range monoplane used for the last attempt, in 1929. Only a thousand gallons of fuel will be carried. There will also be a robot pilot in order that the two pilots may be relieved of considerable routine during the flight. The automatic airmen will be able to take safe and complete control once the course is set.

Squadron Leader Gayford was a World War pilot and later served in Egypt and India. He also participated in the annual R. A. F. flight between Khartoum and Cape Town in 1928. Flight Lieutenant Best participated in the annual R. A. F. flight through Africa in 1927.

Platinum Wire

Can Be Drawn So Thin That 25,000 Miles Of Wire Would Weigh Only 55 ounces

A platinum wire long enough to girdle the globe at the equator can be drawn from the precious metal in 280 wedding rings, according to Cecil B. Sivil, of the research department of Baker and Co., refiners of precious metals. The process whereby this can be accomplished has been described in a paper which was presented before the American Institute of Mining and Metallurgical Engineers. The extraordinary ductility of properly melted platinum is demonstrated, Mr. Sivil said, by the fact that it can be drawn into wire as fine as 500 millionths of an inch in diameter. Twenty-five thousand miles of this wire would weigh only 55 ounces.

Believes Asthma At Little Expense. Thousands of dollars have been wasted spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply you.

Compulsory Idle Insurance

Stating that the United States might well take a leaf out of Russia's book in planning for the future, G. H. Roosevelt, nephew of the late President Theodore Roosevelt and city comptroller of Detroit, advocated a system of compulsory unemployment insurance in an address before the International Association of Comptrollers and Accounting Officers here recently.

Keep Douglas' Egyptian Liniment handy.

A sure, speedy remedy for burns, sprains, fevers, blood poisoning, soft corns, warts, acid feet. Invaluable for inflammation and muscular rheumatism.

Manitoba Pest Beds

A request is being made by the Federal Department of Mines for persons interested in the pest industry for a survey of the pest beds in the northeastern part of Manitoba.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

Reach Adjustment Plan Of Losses Sustained On Wheat Pool Advances

Ottawa, Ont.—Western provinces' representatives and bankers, meeting in conference Saturday, June 27, arrived at a plan of adjustment of losses sustained on guaranteed advances made by banks to the wheat pool, in connection with the handling of the 1929 wheat crop.

The adjustment is understood to be by way of bonds, and though the plan is to be carried back to the governments of the three prairie provinces for official approval, no difficulty whatever, it is stated, will be expected by these provincial administrations in clearing up the matter.

Manitoba, Saskatchewan and Alberta guaranteed the banks against any losses sustained by reason of advances made to the wheat pool on the handling of the 1929 crop. It has been estimated that the losses totalled \$22,000,000.

While the Dominion government is not directly concerned, Premier R. B. Bennett sat in at the conference "in a friendly way" to give what assistance he could in the discussion of the method of adjustment.

Premier J. E. Brownlee, Alberta; Premier J. T. M. Anderson, Saskatchewan; Hon. R. A. Hoey, Manitoba Minister of Education, with representatives of the Royal, Montreal, Nova Scotia, Commerce, Imperial, Dominion, and Toronto banks were at the conference.

Immigration Restrictions

Policy In Future To Be Disassociated From Politics

Ottawa, Ont.—"So far as this government is concerned in connection with immigration, I hope—and I believe that hope will be realized—that if politics in the past has entered into the question, we have learned our lesson," said Hon. W. A. Gordon, Minister of Immigration, in the House of Commons. The mistakes of the past had been made manifest to him in the department, he continued, "and in the future, immigration will be conducted only in the interests of the country."

"So long as I am in power," the minister continued, "the immigration policy of this country will not be dictated by transportation companies and booking agencies whose interests are governed solely by their pockets."

Northwest Rebellion Pensions

Ottawa, Ont.—Sixty persons are still drawing pensions as a result of the northwest rebellion of 1885. This was brought out during consideration of estimates of the Department of Pensions and National Health, in the House of Commons. The pensions item, \$30,000, was approved, also an appropriation of \$5,000 for civil servants who suffer as a result of aeroplane flights while on duty.

No Archives Branch For West

Ottawa, Ontario.—The government has no intention of establishing a branch of the archives department in Western Canada at present. When the civil government vote for this department was before the House of Commons supply committee recently, Hon. C. H. Cahan, secretary of state, said representations had been made, but no action was contemplated at present.

Legal Difficulties Would Hinder Establishment Of A Wheat Board

Ottawa, Ont.—Legal difficulties surround the establishment of a wheat board, Premier R. B. Bennett told the House of Commons. Representatives of the three prairie provinces were in consultation with the federal government and suggestions were made, said the prime minister, which might surmount the difficulties. No decision, however, was made at the conference and the western representatives still were considering the plans submitted.

John Vallance, Liberal member for North Battleford, introduced the subject. He asked if the government in view of the representations, intended to create a wheat marketing board. Recent judgments of the privy council affected the question, said Premier Bennett. It had been established it was not competent for the Dominion to infringe upon the sovereign rights of the provinces and it

Would Establish Wheat Pool

Premiers Make Proposal To Government At Ottawa

Ottawa, Ont.—Representatives of the governments of the three western provinces and wheat pool officials discussed the wheat situation with Premier R. B. Bennett, and members of his cabinet.

A proposal was submitted to the government for the establishment of a Dominion wheat board, which would take over the marketing of this year's crop. The wheat wheat situation in the western provinces was canvassed in the course of discussions. While there was no announcement made, it is understood that the Dominion government made no intimation of its definite decision. Further conversation is expected to take place.

Western representatives included Premier J. E. Brownlee, Alberta; Premier J. T. M. Anderson, Saskatchewan; Hon. R. A. Hoey, Manitoba Minister of Education; H. W. Wood, Alberta wheat pool; A. J. McPhail, Saskatchewan wheat pool; and R. D. Purdy, Alberta pool.

Passing Of "Trader" Horn

Notable Figure Dies In London, England, After Brief Illness

London, England.—Alfred Aloysius "Trader" Horn, co-author of the book, "Trader Horn," died recently in a hospital at Whitechapel after a brief illness. He was about 78 years old. "Trader" Horn rose from a peddler of trinkets in Johannesburg, South Africa, to a social lion in the literary capitals of the world. He spent most of his life among the natives of the dark continent, and capitalized his lore in the book "Trader Horn," written in collaboration with Mrs. Ethelred Lewis.

He visited North America in 1928, delivering a series of lectures and amazed literary gatherings with his tales of adventures in the jungle. Conquering a desire to return to Africa, he went to England and spent the last years of his life with his sister.

New Potato Policy

Grading Regulations Are To Apply To New Crop

Ottawa, Ont.—Third reading was given by the House of Commons to a bill designed to bring new potatoes within the scope of the grading regulations.

E. J. Young (Lib., Weyburn), charged that the government was endeavoring to bring the exclusion from Canada of United States new potatoes, attempted by order-in-council several weeks ago. Hon. W. R. Motherwell, ex-minister of agriculture, declared the measure was merely an extension of operations of existing grading regulations.

Completing Memorial

Quebec, Que.—The work of completing the memorial at Vimy Ridge to Canada's war dead is progressing materially, and the names of 10,000 Canadians who were missing from the memorial have now all been engraved, according to Major-General S. C. Mewburn, of Ottawa, chairman of the Canadian War Memorial Commission. The figure of Canada has been completed.

Could Not Fix Prices. This Had Been the Judgment in a Case Concerning Newspaper. There Were Limitations to the Jurisdiction of the Dominion and It Is Far More Difficult to Create Such an Organization (a Wheat Board) Than It Is to Speak About One.

To E. J. Garland (U.F.A., Bow River) Mr. Bennett said a province could not validly enact an act of the Dominion. Federal jurisdiction either existed or it did not and no province could pass enabling legislation.

In closing—the incident—Premier Bennett said there was "a large body of public opinion against a wheat board." Because of this, care must be exercised. It might be comparatively easy for any person to go to the courts and secure an injunction restraining the board from functioning and finally have it declared unconstitutional.

Government Annuities

Maximum Annuity Reduced From \$5,000 To \$1,200

Ottawa, Ont.—Second reading was given in the House of Commons to a bill reducing the maximum annuity obtainable under the Government Annuities Act from \$5,000 to \$1,200. The measure was then referred to the committee on banking and commerce for further consideration.

On the motion of Premier R. B. Bennett to refer the bill to the banking and commerce committee, R. H. Mackenzie King, opposition leader, moved an amendment to have the measure referred to the committee on international and industrial relations. Mr. Speaker Black ruled the amendment out of order. Liberals then challenged the motion of the prime minister to send the measure to the banking and commerce committee.

A division followed and the motion of Premier Bennett carried by a majority of 49 votes. The division stood: For, 103; against, 54. U.F.A. Progressive and Labor members supported the government, who voted solidly for the motion. The two Independents (Mr. Neil and Mr. Bourassa) voted with the opposition.

The original government annuities bill was designed for the poor man and a limitation on annuities obtainable had been placed at \$500. Premier Bennett informed the House. Increases in this maximum had taken place until the limit was at present \$5,000. It was never intended that the state should provide annuities, which were free from income tax, paying the expenses from private companies.

It had been found also that certain "traders" invested in large annuities, which were free from seizure for debts, and their creditors could, in the time for the consideration of which would come later.

Mr. King thought the annuity scheme might be brought into the scheme of social insurance.

E. J. Garland (U.F.A., Bow River) believed the bill was "in the interests of the insurance companies" and was reactionary in nature. He was willing to let it go to the committee for consideration.

The annuities fund, remarked Henri Bourassa (Ind., Labelle), would be the only nucleus for a social and unemployment insurance scheme and "whether we like it or not, we are being forced into social insurance." He suggested the income tax exemption on government annuities be limited to \$1,200.

Canadian Aviator Will Compete

Montreal Man Enters 1,000-Mile King's Cup Race

St. Hubert Airport, Montreal.—The first man ever to enter in the 1,000-mile King's cup race for the amateur aerial supremacy of Britain on July 25, is a Canadian, and that Canadian is J. C. Webster of the Montreal Light Aeroplane Club.

An aviator as he is able, Webster would talk very little about himself. But this he did emphasize:

"I have no thought of personal glory. I enter this race, not as Webster, but as Canada," he said.

Gandhi Has Faith In Prohibition

Bombay, India.—Mahatma Gandhi has declared his faith in undiluted prohibition. "If I were appointed dictator for one hour for all India," he wrote in his weekly, "Young India," "the first thing I would do would be to close without compensation all liquor shops, destroy all opium palms from which liquor is locally extracted, compel factory owners to produce humane conditions for workmen and open refreshment and recreation rooms where workmen could get innocent drinks and equally innocent amusement."

VISITS MACDONALD

Andrew W. Mellon, Secretary of the United States Treasury, who called on Prime Minister Ramsay MacDonald in London, England, Tuesday, June 26, was present during the whole of the conversation between the British and United States statesmen, which Mr. Mellon described as a "Purely Social Call."

Asking Authority To Provide For Obligations

Government Must Meet Loans Coming To Maturity Soon

Ottawa, Ont.—The House of Commons has given third reading to a bill which authorizes the government to borrow to the extent of \$750,000. When the measure was under discussion, R. H. Mackenzie King, Premier, informed the House that the House had given the House that maturities for next few years would amount to over \$750,000,000.

The former authorization, which had been given by parliament during the session of 1928, and which amounted to \$500,000,000, was now exhausted, and it was considered desirable that the government should be placed in a position to take advantage of any opportunities for obtaining money advantageously, which might occur.

Mr. Bennett stated that the obligations of the Dominion, not provided for in the last conversion loan, up to and including the year 1937, would total approximately \$817,000,000.

Peace River Railway

Construction Of Road From Peace River To Coast Is Assured

Edmonton, Alberta.—Definite assurance that construction of a railway outlet from the Peace River district to the Pacific Coast has been decided upon, has been given by Hon. H. H. Stevens, Minister of Trade and Commerce, said G. H. Crane-Williams, director of the Austin Motor Company, and prominent British business man, who called upon Mr. Stevens in Ottawa recently and who is now in Edmonton.

Mr. Crane-Williams says he also was assured that the route for the Peace River outlet has been selected and that it is necessary for the appropriation only to be passed for the work to be undertaken.

Postmasters Dismissed

One Hundred and Three Believed Of Duties Since March 1st

Ottawa, Ont.—One hundred and three postmasters have been dismissed since March 1, 1931, according to a reply given in the House of Commons to a question asked by Hon. P. J. Venig (Lib., Gloucester).

The province of Quebec heads the list with 58 postmasters dismissed, while Nova Scotia, with 21, is next. Other provinces follow: New Brunswick, 22; Ontario, 8; the four western provinces, one each, and Prince Edward Island, 9.

Fourteen Officers Injured In Violent Riot Of Winnipeg Unemployed

Winnipeg, Man.—Fourteen policemen are in hospital following a violent riot of unemployed men and women outside the hotel where Senator Gideon Robertson, Dominion Minister of Labor, had been conferring with city relief officials. Stones and sticks were thrown, blocks of cement tossed about and policemen's billys were turned upon an officer during the fray.

More than 1,000 gathered in a milling mob, aroused by the frantic yells of a woman who sought to have the crowd force its way into the building after jobless delegates had been refused entry.

One hundred policemen were called into action to quell the rage of the mob, and for a time guerrilla warfare, with rocks and cement blocks as missiles, was waged in the streets. Seven men were arrested before the crowd had been dispersed, among them one alleged to have struck Constable John Brune with his own night stick when he was caught in a swirling eddy of bodies as the crowd moved along. Most seriously hurt of the policemen, Brune is believed to have suffered a fractured skull as well as a broken arm.

The howling jobless claiming entry to the hotel were sent on the run into adjoining streets when policemen rolled down upon the rioters with swinging billys. But a group of the jobless sought refuge behind the corner of a building two blocks down the street and showered with missiles the constables who sought to dislodge them.

SHI Drawing Pensions

Ottawa, Ont.—Sixty persons are still drawing pensions as a result of the Northwest rebellion of 1885. This was brought out during the consideration of estimates of the Department of Pensions and National Health, in the House of Commons. The pensions item, \$30,000, was approved, also an appropriation of \$5,000 for civil servants who suffer as a result of aeroplane flights while on duty.

Less Wheat In Storage

Fort William, Ont.—Stocks of Canadian wheat in store in all positions are 18,100,157 bushels less than this time a year ago, according to the weekly report issued by E. A. Ursell, statistician to the Board of Grain Commissioners. The drop was aided by a decline of about 5 1/2 million bushels in the storage amount during the past week, the figure now standing (June 24) at 115,917,258 bushels.

Canada's First Obligation Is To Feed Its People, Says Senator Robertson

Winnipeg, Man.—Canada's first obligation is to feed its people and it will be carried out, declared Senator Gideon Robertson, Dominion Minister of Labor, at the conclusion of an unemployment conference here. The minister conferred with a Manitoba provincial committee, including representatives of cities, towns, and municipalities.

"Nobody knowingly will be allowed to starve in Canada," he declared. He added that he had no doubt that a good many unemployment relief undertakings will be got under way by the Federal Government shortly. "You will appreciate, however, that no member of the government can commit his colleagues to any statement as to what will be undertaken," he informed the meeting.

The west was looked after first and after that attention will be paid

to the needs of the east, the minister said. His tour of Saskatchewan revealed unprecedented conditions. Senator Robertson said with his 30 years' experience of Saskatchewan, he could hardly have believed the conditions he had witnessed. There was an area populated by some 150,000 people visited by crop failures for several years in succession.

In regard to demands from municipalities for full Federal Government assistance, Senator Robertson said that many were not playing the game. "However, much they denied it, the municipalities themselves had contributed to the ill effect of present conditions by planning, and banking on the future to enable them to carry on." He declared the government would do its utmost to alleviate conditions, "but those municipalities that are able to contribute to meet the situation and refuse to do so, will find themselves disappointed."

The Manitoba representatives asked for the Dominion to bear an increased share of unemployment relief. The minister of labor declared his government was willing to extend substantial help "to tackle the problem in co-operation with provincial and civic authorities." He was remembering the limitations of the province and municipalities and he asked the conferees to remember that the Dominion Government also had its limitations.

In summing up the situation to the minister of labor, Premier John Bracken stressed the need of markets for the products of prairie farms to relieve the serious situation. He pointed to the great slump in wheat prices and the heavy production of grain. Unless production is lessened or the farmers secure a better price, living conditions on the farms will be reduced to that of peasants, he declared.

Seeking Markets For Butter

Ottawa, Ont.—An effort will be made to improve the position Canadian butter companies occupy on the market of the United Kingdom. Dr. J. A. Rudwick, dairy expert in charge for England and will address meetings of the London Provision Exchange and similar exchanges at Bristol, Manchester, Glasgow and other centres.

LINDY ALL SET FOR THE FLIGHT TO THE LAND OF THE RISING SUN

The much-heralded flight of the Lindberghs to Japan and China, via the Pacific Ocean, is expected to commence very shortly. This picture (left) shows Col. Lindbergh and Ann Morrow Lindbergh arriving at the landing field to inspect the plane in which they will attempt the hazardous trip. The photo on the right shows the Lockheed-Sirius monoplane being tried out by Colonel Lindbergh over New York.

NOTES AND COMMENTS

When three blasts are heard from the mines indicating no work for the following day, and at the same time receive news that a Winnipeg firm is reported to have placed an order for 42,000 tons of steam coal with U. S. mines, it makes men realize there is more than one nigger in the coalpile.

Commenting editorially on the subvention of freight rates granted by the Federal government, the Calgary Albertan states: "The next movement in the endeavor to promote the use of Alberta coal would seem to be imperative on the coal operators and mine owners. With these subventions and special freight rates initiated for their benefit, the country may be considered to have done reasonably all that might be expected. The advantage now lying with the operators, it is their duty to push the sales of their products in the markets so safeguarded for them. If the bonuses have the effect that might be anticipated, there should be a great deal more work available for Alberta miners from now on."

Talking of truth, the following excerpt is taken from a press bulletin which is worth taking notice of:
Experience teaches that tact and diplomacy build business better than bald statements of fact.

A soft answer turneth away wrath. Kind words butter no parsnips, but every one's vanity blushes gratefully at a touch of conversational oleomargarine.

You are engaged in chasing the slippery shekel, and though your unprintable opinion of some customer may be justified, the too-frank expression of that opinion may put red ink on your balance sheet.

The naked truth, Horace, but not too naked.

"Why are there not more Canadian writers in Canadian magazines?" is the question often asked. The answer is—because the monetary returns are so small that it does not pay for the time and effort involved. Were it not for the love of writing by many, there would be less by Canadians. A. F. Key in the Drumheller Mail plainly states the truth. From one cent to less than half a cent a word is paid to most magazine writers, while for newspaper correspondents of the rank and file it is often less.

Many correspondents do not write the news of their home towns because of the money in it. They do it to keep their towns on the map in the daily papers. The monetary reward does not pay for the time spent. A correspondent might spend from half to a whole day digging up information on a subject of interest, which may result in news which at space rates may pay him from \$1.50 to \$3.00, or maybe nothing. For reward, it is far worse than joining the ministry, yet people imagine there is real money in it. A writer must live, but it is very few you notice driving expensive or inexpensive automobiles or indulging in even mild extravagances.

An outburst of public indignation arose from the Crows Nest Pass when it was learned that a company owning a

central heating plant in Winnipeg had placed a contract for about 50,000 tons of coal with United States companies. It is one of the rotten breaks the Alberta coal mines have to face and try and find measures to promote the use of Canadian coal.

The manager of the company stated they would have likely used Canadian coal, but they saved \$25,000 in purchasing Virginia coal. Patriotism cuts no ice when dollars are at stake. In this price cutting war everybody suffers, the workers most of all. Companies obtaining business on a price-cutting basis buy everything on the same plan. To sell to them you have to cut the heart out of the price till you sell at no profit or at a loss. The vicious circle hits the worker so hard that finally he is forced to rebel in order to live. Its a demoralizing process and is like the "dog-eat-dog" policy until at last there is only one dog left. He finally starves to death because there are no dogs left on which he can feed. When so-called efficiency brings the world to its present condition, what can be said of it? Sensible people will see that instead of this policy, there must be a live and let live attitude if people are to prosper. The clash of interests will become so acute that revolution will come from the masses if there is not a change. Legislation will be demanded to ensure the worker a fair living instead of being a slave, which would have happened long ago were it not for trade unions. Greed is uppermost with its strangling selfishness. It causes strife in civilian life and is the cause of bloody wars.

The late General Wm. Booth, founder of the Salvation Army, said it was built up by the free-will offerings of the poorer classes. Down at Halifax an Anglican bishop said it was bad to see church funds raised by means of

whist drives and other forms of entertainment. People should give direct if they wish their churches to function. On a recent Sunday evening there were possibly a total of 75 people attending two or

three church services in Coleman. And the population is around the 3,000 mark. 24 per cent. were at church, 974 per cent. were—Lord knows where! No wonder churches find it hard to finance.

Consolidation Of Debts Is Suggested As Solution Of Economic Problem In West

Only by reorganization and consolidation of debts will it be possible to remove the menace of fear and discouragement that oppresses the western farmers, merchants and other business interests, said Prof. W. W. Swanson, head of the economics department, University of Saskatchewan, and adviser to Premier R. B. Bennett, when he remarked now was the time to deal with the critical situation which had developed from crop conditions, frozen credits, low prices for farm products, by attacking the debt and credit problem on a comprehensive scale.

Dr. Swanson, who is in communication with the prairie premiers and Premier Bennett, said that the three most urgent problems seeking solution in the west were debt adjustment, unemployment and provision for marketing the coming crop. He outlined a plan for dealing with these questions.

He considered that the debts should be divided into two categories of fixed and floating obligations. The fixed debts, which included mortgages, should be automatically extended without cost to the farmer for a period of three years, during which time steps could be taken to develop a plan for a more permanent settlement.

The second group of debts, oil, gas, accounts at country stores, bank loans and so forth, Dr. Swanson estimated amounted to \$250,000,000 and upward for the 250,000 farmers in the three prairie provinces.

He considered that these should be consolidated and paid by bonds with a substantial reduction in the interest rate. The federal government to pay one-third, the provincial government one-third, and the farmers the balance.

These bonds would have a life of three years, during which time all legal processes against farmers entering the scheme would be prevented.

Pheasants For Manitoba

Efforts Made To Increase Game Resources Of The Province

The Provincial Government is co-operating with the Manitoba Game Protective League in introducing ringneck and Mongolian pheasants into Manitoba. A shipment of 300 eggs is now en route from the Pacific coast and will be distributed to experimental farms within the province. Experiments will be carried on with the two varieties to discover which is better suited to Manitoba climatic conditions.

Last year the Game Protective League distributed 4,000 eggs in small lots among individual farmers and it is estimated that 2,000 birds were hatched from these settings. Efforts to increase the game resources of Manitoba are designed both for the benefit of the resident and of the professional sportsman.

New Agricultural Colony

Group Of Ohio Farmers Settle In British Columbia

Shell Lake, northwest of Prince George, has been selected by a group of Ohio farmers as the site of British Columbia's newest agricultural colony. They have acquired most of the land around the lake and 18 settlers have arrived there to build homes for themselves during the present summer. More will come later. A large community house has been built on the lake shore to accommodate the new arrivals while they are building houses, and the equipment of the colony includes a portable saw-mill for making lumber and an electric light plant. The colonists are developing their settlement without assistance from the government. They come from Youngstown, Ohio.

Germany has issued 3,500,000 licenses to owners of radio sets.

Cheaper Summerfallow

Light Cultivation To Keep Down the Weeds All That Is Necessary

Scientific agriculturists at Universities and Experimental Farms have recently been giving a good deal of thought to the question "Why Do We Fallow?" Some experiments that have been made, particularly by Mr. J. C. Taggart, Superintendent of the Dominion Experimental Farm at Swift Current, Sask., seem to indicate that under certain conditions we can obtain just as good results in our fields without so much ploughing.

The only reason for working the land in Western Canada should be to keep down the weeds. The only reason for summerfallowing should be to conserve moisture, but these two things are somewhat antagonistic. There should be no cultivating of the ground beyond the very minimum required to control weeds. Experiments show that shallow tillage is just as efficient for producing crops as deep ploughing, provided weeds are killed. Shallow tillage, too, is considered to be less conducive to soil blowing than deeper tillage.

The suggestion is made, therefore, that under conditions where the method is practicable that farmers might save a good deal of money by simply cultivating stubble that is intended to be summerfallowed instead of ploughing it as usual, cultivating it not more than three inches deep and only at sufficient intervals to keep down the weeds, always remembering that it is the weeds that mainly rob the summerfallow of moisture.

The Agricultural Research Department of the Saskatchewan Grain Company would be very glad to have parties of results from any farmers who have tried this method or who may try it this season. The writer summerfallowed large fields by this cultivating method at Penn, Alberta, for three years running, and obtained results that were just as good as from adjoining fields that were ploughed in the usual method and, of course, at a much cheaper cost. The fields seem to be even cleaner from weeds and the yield certainly just as good. The writer further noticed that in his plot work where weeds are pulled by hand that greater yields were always obtained than on those plots where the weeds were cultivated with a machine, thus certainly indicating that the land should not be stirred up by any implement any more than absolutely necessary to keep down weeds.—H. G. L. Strange.

To Combat Cutworm Ravages

Danger May Possibly Be Worse Next Season Than At Present

In all probability the danger to crops from the pale western cutworm may be worse next season than this, and in this respect the use of the "indicator strip" is advised, states H. L. Seamans, of the Dominion Entomological Laboratory, Lethbridge, Alberta, in a letter to the Saskatchewan Bureau of Publication.

Satisfaction that "indicator strips" shown this spring give a true indication of the extent of cutworm infestation has been expressed by the majority of farmers using this method. Mr. Seamans notes.

Safe Petrol From Tar

Chemists at the Belfast Municipal Gas Works announced they had produced a non-inflammable petrol from coal tar oil which can do four miles to the gallon than the ordinary gasoline used in automobiles. They assert there is no carbon monoxide in the exhaust, engine knocks are eliminated and the fuel is cheaper than the present commercial article.

DON'S ENGLISH OUTFIT

Don Jaime, second son of King Alfonso of Spain, seems to be fully resigned to his exile. He is seen above strolling through The Strand, London, England, dressed in unconventional English suit of navy blue with grey hannels.

Canada Can Compete

Able To Hold Own With Russian Growers Or Those Of Any Other Country

Canadian wheat growers will be able to compete with Russian growers or those of any other country, in the opinion of a prominent official of the Canadian Wheat Pool. Europe will continue for generations to be a large importer of wheat and Canada has the greatest net comparative advantage of any country in being the source of supply, according to this official, who has recently made a personal study of conditions in Europe, including Russia. He believes that Europe will continue to require large quantities of foreign wheat and that Canada is in a perfect position to supply it.

Minerals By Airplane

Radium Ore To Be Transported By "Plane From Great Bear Lake"

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation.

Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

Sugar Maples In Canada

The natural range of the sugar maple in Canada extends from the Maritime Provinces to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 75 to 80 feet in height and two to three feet in diameter. It occurs either in pure stands or is found associated with other hardwoods.

History Of Water Power Development In Canada One Of Remarkable Achievement

More Parking Space

Saskatchewan Providing Recreation Grounds For Tourists and Others

Saskatchewan is providing more parking space, not only for fivers, but for tourists and holiday makers. Manitou Provincial Park, situated along the western shore of Little Manitou Lake, near Watrous, Sask., is now open. This is the first Provincial Park to be created in Saskatchewan under the direction of the Provincial Department of Natural Resources. A similar park is planned at Midge Lake and plans are also made for others to serve different portions of the province.

The Canadian Government park north of Prince Albert, created a few years ago, has been a factor in furnishing helpful recreation for the population and in attracting tourists. It is expected that the new provincial parks will have a similar effect.

Alaska Out Is Vigorous

Promises To Fill Important Place As Early Variety

Among the early varieties of oats, the Alaska, which has been receiving some considerable attention in recent years, is giving great evidence of vigor and growth under field conditions during the present season. A field of registered Alaska under observation in Elgin County, Ontario, this spring has showed every evidence of rapidity of growth, stooling and general vigor.

The Alaska oat matures at about the same time as the O.A.C. No. 8, and is somewhat stronger in the straw with a good quality of grain. It is one of the registerable varieties under the Canadian Seed Growers' Association and promises to fill an important place as a vigorous strawed early oat.

Have Real Grievance

Farm Women Object To Being Told They Have No Occupation

Census declarations which refer to housewives as persons of "no occupation" came in for condemnation at the annual farm women's weekly conference at Saskatoon. It was declared that the wording of the census declaration was a keen injustice to wives. They work on the farms from daylight to dark and now they are described as persons of "no occupation." It was felt women, in many cases, were responsible for keeping farms in operation during the present depression. By the marketing of cream, butter, poultry, and eggs, branches of farming looked after by women, they had aided materially in holding their lands and homes.

Worked Up Good Business

Out of a Job, a young New Yorker got an idea there was money to be made rehabilitating neckties, as Joseph Van Raalte tells the story. He started out by cleaning and pressing ties at 12 for \$1. Trade has become so brisk that he has invested in a delivery car, on the side of which are painted the words "Necktie Ambulance." A big city offers no end of ways of making a living for the man or woman with ingenuity.

Every calling has its compensations. Ushers are the only men who can put women in their places.

Each country develops its power-producing facilities along the most economically desirable lines and special facilities for power production constitute a definite national advantage. Canada possesses this advantage in a marked degree by reason of the extent and location of her water power resources which are such that, except for a relatively small proportion, her entire settled territory enjoys hydro-electric service. Not only is this true at the present time but there are sufficient undeveloped sites to assure the advantages of this service in the face of expanding demands and advancing settlement.

While complete information regarding the water power resources of the Dominion is not yet available, the Dominion Water Power and Hydro-metric Bureau of the Department of the Interior has collected and analyzed all the stream flow and power data that can be obtained with the purpose of preparing a reliable estimate of the total resources. This estimate places the total power ordinarily available twenty-four hours per day, and every day in the year, at over twenty million horse-power with an additional thirteen million available continuously for six months in the year. These figures are based upon an eighty per cent. efficiency of generation. As a matter of fact, power is seldom required continuously at full load, and many sites are developed to produce considerably more than their capacity, rated at the continuous or even six months basis, they being used to store the flow at times of light load and draw upon it when the power demand is at its peak. An estimate of existing power installation indicates that the presently known resources would permit of a total turbine installation of approximately forty-four million horse-power.

The history of water power development in Canada is one of remarkable achievement; when the century opened the installation was only 173,000 horse-power, by the end of 1910 it had almost reached one million horse-power, ten years later it was over two and a half million, and at the end of the third decade it was well over six million horse-power.

The provision of this power for the use of the country has, of course, been of incalculable value; in addition, however, the water power industry has afforded much profitable employment to capital and to labour. It is estimated that a sum approximating \$1,500,000,000 has been invested in the industry. Of this amount, the industry employed \$50,000,000 in 1930 and a further \$300,000,000 will probably be expended in the next few years.

Sleepless Lose Height

Students Claim Loss Of Half Inch After Test

A loss of half a inch in height is claimed to have followed a 100-hour-of-sleeplessness experiment carried out by two University of Georgia students.

Their mental acuteness was decreased by half; concentrated attention was practically impossible; steadiness of nerves and coordination of mind and body were impaired. Eyes suffered strain, but sight was not affected. They found it most difficult to remain awake between 11 p.m. and 5 a.m. After two weeks of rest, following the experiment, their height was regained.

Lindbergh May Fly North

Col. Charles A. Lindbergh has tentatively decided on the route for his forthcoming flight to the Orient, but this is to be a vacation trip and no definite schedule will be followed. He said that he and his wife were at present working on a course leading northward to Hudson Bay.

Cyprus has started two large reforestation projects.

"The doctor told me to leave town at once."
"Which doctor?"
"A doctor of law."—Ulk. Bortun.

VESSEL PARTLY DESTROYED BY FIRE

Above is a picture of the \$7,000,000 Furness liner Bermuda, which was partly destroyed by fire and sank in Hamilton Harbor, Bermuda, shortly before it was to sail for New York with a big passenger list. The Bermuda is one of the largest motorships in the world. She is 550 feet long, 20,000 tons and has first-class accommodations for 615 passengers.

SUNDAY SCHOOL LESSON

JULY 5

THE GIFT OF THE HOLY SPIRIT

Golden Text: "Ye shall receive power, when the Holy Spirit is come upon you; and ye shall be my witnesses both in Jerusalem, and in all Judaea and Samaria, and unto the uttermost part of the earth."—Acts 1.8.

Lesson: Acts 1:6-14; 2:1-47.
Devotional Reading: John 16:7-14.

Explanations and Comments

Christ's Reply To a Question, 1:6, 7.—The disciples had had their vision of their risen Lord, and now it seems that He manifested Himself to them once more before His final departure. The question which had engendered much of their thoughts during His life with them was still uppermost in their minds, and now that He was alive after His crucifixion, must it not be that He would restore the kingdom of Israel, become king of an independent Jewish state? This they asked Him. "They argued—and doubtless we in their place had argued, too—that nothing would be of such great service to them as definite knowledge of the part they were to play in the opening picture."

"It is not for you to know times or seasons, which the Father hath set within His own authority," was the answer of Christ. "Are there few that shall be saved?" once they had asked Him and He was silent. "Lord, what shall this man do?" Peter had queried about John, after Jesus had revealed to him that he should die a martyr's death, and Jesus had replied, "What is that to thee? Follow thou Me." So now, in answer to their questions of curiosity, He replies, "It is not for you to know," Jesus refused to give the kind of knowledge that would gratify the curiosity or the intellect, but he never was silent regarding matters of conduct.

The World Task, 1:8.—But ye shall receive power, when the Holy Spirit is come upon you, and ye shall be my witnesses both in Jerusalem, and in all Judaea, and unto the uttermost part of the earth. "His answer implies that He would restore the Kingdom to Israel; not, however, to Israel after the flesh, as the apostles imagined, but to the Israel of God; that is, to Christian believers of every nation, by making Christianity the dominant religion throughout the world."—Dummelow.

And ye shall be my witnesses both in Jerusalem, and in all Judaea, and Samaria, and unto the uttermost part of the earth. "The missionary enterprise is not the Church's afterthought; it is Christ's forethought!"—Henry Van Dyke.

Waiting and Praying, 1:12-14.—The apostles, together with Mary, the mother of Jesus, and other women and brethren, returned to Jerusalem and, in the Upper Room where they were wont to meet, with one accord continued steadfastly in prayer.

Empowered For the World Task, 2:1-4.—The word Pentecost means "the fiftieth day feast"; it received its name because observed fifty days after the third day of the Passover, Leviticus, 23:16. On the day of Pentecost following Christ's crucifixion, ten days after His departure, the disciples were together in Jerusalem still waiting for the promised coming of the Holy Spirit, for which they had been praying.

Suddenly there came a sound which was not that of wind (but a mighty, rushing wind was the only thing which Luke could not find for which he had been praying. Compare 1 Kings 19, 11-13; John 3:8. And they saw something which was not fire, but only compared to tongues of fire resting upon each one.

And they all, not the apostles only, but the one hundred and twenty followers of Christ, there present, were filled with the Holy Spirit, "filled as a sponge dipped into the sea is filled with the ocean." This is the great fact of Pentecost. The symbols which were like wind and like fire disappeared after a time; the accompanying gift of "speaking with tongues" was also transient, but the Spirit's presence was abiding, and by His aid they were enabled to perform the great commission of proclaiming Jesus Christ and the power of His resurrection.

Imperial Cadet Expedition

Arrangements Completed For Visit Of British Boys To Canada This Year

The committee of the headquarters conference, representing 151 public schools of the British Isles and 27 schools overseas, has approved arrangements for the Imperial cadet expedition to Canada this summer.

According to word received at Ottawa, Major W. L. King, M.C. (Cheltenham), will lead the expedition, composed of 25 cadets with Lt. C. Burton-Brown (Bradfield), as second in command.

The team will sail from Southampton on July 29.

Beds Of Oyster Shells

Alberta Discovery Will Be Developed Commercially

Oyster shell, great beds of them, have been found on the Oldman River near Hillspring, Alberta, and will be developed commercially. The oyster shell, according to tests made at the University of Alberta Laboratory, is almost pure lime and will be marketed by a syndicate for fertilizing poultry feed and lime. The shells are deposits from prehistoric times, vestiges of marine life when this portion of the west was the bed of a great sea.

L.O.O.F. GRAND MASTER

M. A. Fletcher, Colgate, Sask., who has been elected Grand Master of the L.O.O.F. of Saskatchewan for the year 1931-32.

Prairie Mining Industry

Over Five Million Dollars Paid Out In Wages in Manitoba and Saskatchewan

In the course of an article on the growth of manufacturing in Saskatchewan, appearing in "The Hub," Frank A. Boldman, Chairman of the Canadian Manufacturers' Association, notes that "The mining industries of Northern Manitoba and Saskatchewan, in 1929, spent over \$5,000,000 in wages. Three hundred thousand dollars were spent for groceries, vegetables, meat and other necessities of life; 2½ million dollars for machinery, and over 1½ million dollars for other supplies; in short, the mining industry spent, in round figures, about \$12,000,000 in 1929."

Tax Exemption Requested

Exemption Of Cream Cheques From Two-Cent Tax Is Urged
Exemption of cream cheques from the two-cent tax has been urged upon the government in a memorandum presented by the National Dairy Council.

The memorandum says that throughout Canada farmers daily receive small cheques amounting to from \$2 to \$4 on delivering cream to creameries.

It is contended the price of the product will be adjusted on account of the stamp tax so that the farmer will eventually be the loser.

Opens Branch In Los Angeles

The Canadian Bank of Commerce has announced that the Los Angeles branch of the California subsidiary opened for business on June 17. Preparations have been under way for the opening of this branch for some months. It is the first representation of a Canadian bank in Los Angeles.

Botanists have discovered on the Hawaiian Islands nearly 700 varieties of plants that are found nowhere else.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE.—After many adventures flying over China, Captain Jimmy and his dog Scottie were captured in a freight train and met a friend, Lieut. Stone on board, seeking a brother who has also been captured by bandits.

After we had cut the freight engine free from the cars, we roared along the tracks at a great rate. Now and then we rushed by little groups of soldiers in the fields. Soon we would be near the enemy's headquarters.

"We're getting close up to the line," I yelled about the infernal racket and the snatching of the line was making. "Before long we must be on foot. Otherwise some stupid Chinese General may send some of his hundreds of soldiers to act in action with our brakes and whistle. You understand, Jim, I added.

"Too late. Here is Stone replied. There, on the track, not half a mile away, was an immense number of soldiers. There were plenty of them on horseback. Jump before we're hit, Jed," I yelled. "Get a horse, someone and ride for those woods. There will be plenty of vacant ponies when they hear us in action with our brakes and whistle. You understand, Jim, I added.

"Uh huh—me savvy," I answered. The group of soldiers stood in the obstruction on the track and waited for us to arrive. Quite apparently they expected us to set the brakes and come to brakes. But they didn't know our freestyle.

Down we bore on them—not at any great speed—but I could see that we were going to hit with a sound thump. Suddenly we jammed on the brakes, pulled the whistle valve wide open and skated into their midst like a shrieking, fire-eating dragon.

"Jump!" At jump we all did. Scottie went into action with the rest of us, and, having been hit in the back by one of the soldiers, he quite naturally jumped higher than the others.

"Out of the corner of my eye I saw him stir the air," a Chinese officer was striving to quiet a frantic horse, straight as a bullet sailed Scottie landing right on the back of that Chinaman's neck.

"Off the horse they both went, and of all the blood-curling yells—where?—that officer just knew the old dragon had got him at last."

Meanwhile I was doing a bit of sailing on my own account. I jumped for a man on horseback but I miscalculated my speed and missed him entirely. Just behind him, however, was a second mounted Chinaman, and I closed in on him like a foot-ball kicker and off he went.

There was no time for a regular salute about the palaver and I had no time to get out of the horse. Our old locomotive had slid into those ties, kicked a few off the track then rolled over on her back, wheels in the air, like a tired old horse.

Note.—Any of our young readers writing to "Captain Jimmy," 2010 Star Blvd., Toronto will receive his signed photo free.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups.
— Pound and half pound tins at your grocers

Lindberg Is Taking

Every Precaution

Providing Every Known Means Of Safety For Air Trip

If Col. Charles A. Lindbergh and his wife should crash at sea, during their projected flight to the Orient, they will swim to the surface to find a bundle already floating there. In it are means of sustenance, transportation, and even communication with the world.

Undeveloped the bundle, automatically released from a tall compartment when the plane submerges, they will inflate the outer wrapping, forming a collapsible rubber boat. Inflation is effected by a bottle of compressed air.

Climbing into the boat they will find a mast and sail, emergency rations and a radio set, capable of communications for 500 miles at night. The daytime and 3,000 miles at night. The set is both crash proof and water tight.

The Lindberghs will carry two radio sets, one for use in the plane, with a range from 3,000 to 7,000 miles, and the other, the emergency set, for use in case of accident afloat or ashore.

Handel, composer of "The Messiah," remained a bachelor to the end. The parents of his first love insisted that he give up composing music.

New Woollen Mill

British Firm To Erect Factory Near Toronto

A new Canadian woollen mill, which will turn out yarn exclusively, is now erected in York Township, near Toronto, for Patons and Baldwin, Ltd., large woollen manufacturers of Halifax, Yorkshire, England. The first units of the new mill will cost in the neighborhood of \$750,000 and are expected to be ready for operation in six months. The industry will give employment to from 400 to 500 workers and contemplated extensions, which will be undertaken at a later date, will probably double the cost of the plant and entail a much larger staff.

Semi-Precious Stones

Cut and polished semi-precious stones mined in Manitoba are attracting considerable attention. They include the Manitoba sunstone, the Manitoba moonstone, the Manitoba golden beryl and the Manitoba green beryl. Experts have pronounced these stones to be as good as any thing of the kind they have ever seen and state that the same stone a few shades darker would be world famous and of enormous value.

"I never have heard of a perfect man," says a prominent biologist. Brother, you should marry a widow.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness, but 36 inches wide only.

CHAPTER XXI.—Continued.

Almost reluctantly Nick turned to go below, movements with stealth, not wishing to disturb the sleeping occupants of the "Sea Bird." But before he had taken a dozen steps he stopped in surprise. Angela was coming toward him wrapped in a long white cloak, her feet incased in satin slippers that made no sound. She came swiftly forward, and laying a hand upon his arm, said softly: "I couldn't sleep. Take me where no one can hear us, Nick. I want to talk."

For a moment Nick withheld intensely that he had turned in earlier. He didn't want confidences from anyone, and Angela's lowered voice came stealthily manner subtly repelled him. He answered, and hated himself for speaking softly: "I was just thinking of going down. This is no time to talk, Angela. It's after midnight, and everyone's asleep."

"Nick, I—I need you."

Her voice was pleading; her eyes more so; her hand on his arm pressed gently. Nick's pity stirred, even while his heart hardened.

"Won't it keep till tomorrow—what you want to say?"

She dropped her hand from his arm and turned away, a sob shaking her shoulders. That was too much for Nick. Scorning his caution of a moment since, he said, stretching out of hand: "What's the trouble, Angela? Of course I'll let you talk if it will help."

They turned, and going to the stern, sat down together.

"What's troubling you?" Nick asked again.

She raised her head. The moon, creeping from behind the clouds, lit her face sharply, and he saw traces of tears upon her cheek. "I never heard of Painter's Neck before, nor of those awful people; but—but it brought back something else. I shan't go into it. But it's given me a nightmare. We're nearing port, and I don't know what to do. I want you to tell me."

"Tell you what?"

"Why, you've seen how things are, of course. You know Jim Halliday and I can't get along. What you're to tell me is—shall I stick to him? promised—but—but what do you know about the permanency of one's marriage vows?"

The clouds had lifted higher, leaving a path of silver across the sea that led Nick straight to a mountain cabin in old New England. He saw a girl's sweet face upturned to his. He saw himself, a boy then, a boy a little shy of the big moment, a little uncertain about the future, yet full of untold youth: "God's a good enough witness for me, Gay; and I promise you now that I'll love you . . . and be true to you . . ."

He turned to Angela. She was very beautiful in the moonlight, but he scarcely saw her.

"As for one's marriage vows," he answered gently, "I can only say that to me, they were a promise—and that I keep my word."

Her hand drummed nervously on her knee.

"But," she hesitated, "if you knew

—absolutely—if you had proof that your wife had been untrue to you—"

Nick might, of course, have felt furiously insulted at this insinuation. What he actually did feel was wrath. The idea was so utterly absurd that he laughed aloud, forgetting for once his sleeping shipmates. Then, realizing that Angela might have been hiding her own tragedy behind the question, he sobered instantly.

"Forgive me, Angela; but what you said sounded so outrageous. You see, you don't know Gay. Still, if you want a serious answer to a preposterous question, I'll say that when I find my wife has well—used to care for me, I'll leave her free."

She drew a quick breath; stretched out a hand; withdrew it hastily, and arose. Nick, too, arose, relieved that the midnight interview was over. He didn't like this sort of thing, and felt impatient when Angela lingered at the rail, her cloak slipping from her shoulders as if by accident.

Nick moved a step away. Why had she put that question to him, anyway? He was the oracle to settle her domestic troubles? He stirred restlessly, but she chose not to take the hint, and stood gazing down into the water that lapped restlessly against the boat. She had not troubled to replace the cloak, which seemed, in that dim light, whiter than the shoulders that rose above it.

"I wish," she said, and her voice trembled, "I wish I had the courage to slip down into those depths and end it all."

Instantly he was at her side—almost sympathetically.

"Angela! don't say a thing like that. What has come over you? You were gay as a lark this afternoon, or seemed so anyway. Come! what you need is sleep. Things will look brighter in the morning. Surely, my friend, there were worse fates than yours. Your husband isn't a brute. You may not love him, but he's not cruel to you."

"You mean, I suppose, that he doesn't beat me?" Oh, Nick, there are other cruelties.

She lifted those innocent eyes—never so innocent before. Nick wound savagely how anyone could wound her. She looked as helpless as one of his own children. He forgot everything else in his desire to comfort her as he put a hand gently on her shoulder.

"There!" he said, as he would have soothed a hurt or weeping child, "there, Angela, you mustn't feel like this. But if it helps to know that I understand, and—care for your happiness—"

"Oh, it does! It does!"

She turned, and, somehow, slipped. Nick's arm went round her, catching her as she fell, and for a moment she lay, a yielding weight, against his chest. The clouds had gathered again now. The night was dark, and the boat stirred uneasily, like some huge monster tugging at its chain.

Nick likewise stirred.

"Angela," he began, but she raised a hand, pressing it against his lips as if to silence him, and, turning, she slipped an arm about his neck and kissed his cheek.

It was a caress so soft, so sweet, so fugitive, that, alone on the deck for a moment later, Nick wondered if it had been a dream. In sheer surprise he sat down dingly, and taking out his handkerchief, wiped at his eyes.

How had it happened? he asked himself as he tossed restlessly in his narrow berth. It was only to save him from falling that he had caught her in his arms. She couldn't have misunderstood. Perhaps it was merely a kiss of gratitude for his sympathy. Yes (with a sigh of real relief), that was it—a silly kiss. It would be idiotic to suppose she meant it any other way; and yet . . . By George! what was the use of trying to kid himself like this? There was nothing sisterly about it!

Nick arose, and going to the port-hole, looked out, but the stars and moon were no longer visible. As he lay down again, longing for sleep, he had a vague, uneasy feeling that everything was wrong. What was there in a kiss to excite a fellow so?

What would Gay say when he told her? Then—could he tell her? Would it be fair to Angela? . . . How soft her lips had felt against his cheek . . . and there was a fragrance about her, too . . . some sort of perfume . . . or was it merely the scent of shrubs from the island? . . . Darned if he knew . . . Of course he should tell Gay. He hadn't had a secret from her in five years. . . . Still, she didn't like Angela, and—well—dared if he'd like her herself if she kept on this way! Did she think him an innocent with no experience—or a scoundrel?

Mighty funny—that story about Painter's Neck. . . . And Halliday was an uncommon name, as the Colonel said. . . . He wondered if a storm were on the way. There was something confoundingly oppressive in the air. . . . If a storm came An-

gela might be seasick and stay below; but, come to think of it, she was a good sailor! . . . Why in thunder did she have to spoil everything? . . . Perhaps Gay was right. . . . Perhaps . . .

This was Nick's last conscious thought. He slept heavily. It was the Colonel who woke him—an agitated Colonel in striped pajamas, pounding on Nick with one hand even while he struggled frantically with a pair of flannel trousers and a life preserver. The boat was careening at such an angle that for a dazed moment Nick thought he was standing on his head. Then came a crash, and, instantly broad awake, he knew that a hurricane was upon them.

(To Be Continued.)

Wonders Of Electricity

Marvellous Things Seen By Delegates To Banff Convention

Myriads of electrons played and worked at the Canadian Electrical Association Convention at Banff, Alberta, when I. W. Clubb, director of the Westinghouse research laboratories and Dr. Philip Thomas of East Pittsburgh, Pa., combined to control the smallest known things in the world and make them do their bidding.

Lamps were lighted without wire connections, an apple was shot off the head of a robot, and an electric vacuum cleaner got busy when told to do so, and, controlled by a ray of light, cleaned part of the stage floor.

Letters on fast revolving discs were seemingly held stationary by the stroboscopic, ultra-stroboscopic; two pieces of a new alloy became magnetized when held pointing downward and due north, and became demagnetized when the direction was changed.

"The robot" spoke his lines and stood up or sat down when commanded to do so, and most astonishing of all, the many convention-room lights went off, or came on again when Mr. Clubb blew on a proto cell or held a lighted match near it.

Delegates to the convention were given explanations about electrons, their speed of travel around the positive nucleus of the atom and the manner in which scientists are using them.

Was Hard Pressed

Sad Plight Of A Debtor Who Did Not Know Which Way To Turn

A man in Oklahoma is reported to have written to his banker as follows, when pressed for payment of a note:

"It is impossible for me to send you a cheque in response to your request. My present financial condition is due to the effect of federal laws, state laws, county laws, corporation laws, by-laws, brother-in-laws, mother-in-laws, and outlaws that have been foisted upon an unsuspecting public. Through the various laws I have been held down, squeezed, on, sat on, flattened and walked until I do not know where I am, what I am, or why I am."

"These laws compel me to pay a merchant's tax, capital stock tax, income tax, real estate tax, property tax, auto tax, gas tax, water tax, light tax, cigar tax, street tax, school tax, syntax and carpet tax."

"The government has so governed my business that I do not know who owns it. I am suspected, expected, inspected, disrespected, examined, re-examined, until all I know is that I am supplied for money for every known need, desire or hope of the human race, and because I refuse to fall and go out and beg, borrow and steal money to pay away, I am cursed and discussed, boycotted, talked to, talked about, lied to, lied about, held up, held down and robbed until I am nearly ruined; so that the only reason I am clinging to life is to see what the b— is coming next."

Battle Awards For Militia

The fifth list of battle honors awarded to units of the Canadian Expeditionary Force and to the regiments of both the permanent and non-permanent active militia contains those of five units. These are: 1st Strathcona's Horse (Royal Canadians), the Alberta Mounted Rifles, the South Alberta Horse, the Algonquin Regiment and the 1st Canadian Pioneer Battalion.

Milk-Treating Plant For Vancouver

According to a report of the Industrial Secretary of the Vancouver Board of Trade, there will be established at Vancouver within the next three months a new milk-treating plant, at a cost of a little under \$300,000, which will be built by the Operative Pure Bred Jersey Products Association.

Cranky Customer: "Here waiter! Take this roast beef back to the chef. It isn't fit for a jackal to eat."

Willful Waiter: "All right, sir! I'll see that you get another helping that's fit."

PAINS

No matter how severe, you can always have immediate relief!

Aspirin always stops pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. It always brings relief. Why suffer?

ASPIRIN
TRADE MARK REG.
Made in Canada

Advertising Is Essential

Should Be Continued and Carried On In These Difficult Times

"Advertising is the most essential thing that should be continued and carried on in these difficult times of suspended prosperity . . . It must go on," declared T. R. Enderby, general manager of the Canada Steamship Lines, addressing the Montreal Advertising Club. The speaker spoke of the widespread effects on thousands of ship and elevator crews on the Great Lakes when there was but a small grain movement.

"Last year I spoke to you about the grain business and the trouble it was giving us. We are not having any trouble with the grain business this year—there isn't any grain business," Mr. Enderby said.

Frederic Bennett's plan to give a five cent bonus on every bushel of grain exported from Canada the speaker believed was an excellent scheme although he did not think the way in which it would be applied was quite wise.

When ships stopped moving it meant a lot of money was lost. All along the route ship crews and elevators were left unemployed. In the Canadian Great Lakes fleet there can be no doubt of their deadly effect upon farmers. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numerous cases. Farmers have given relief to children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Too Many Complexes

Broad-Minded International Ideal Needed To Save Civilization

There are too many complexes in the civilization of today, according to Dr. George M. Weir, of the University of British Columbia, Vancouver.

"We are developing too much second-hand thinking, crowd thinking," he declared, addressing a Toronto service club. "Our civilization appeals to sickly love romances, and if you don't believe it, go to some of the talkies and movies in your neighborhood."

A broad international ideal would be the best thing to save civilization, he said.

Manitoba Mineral Development

P. E. Billingshurst, a mining engineer in St. Boniface, has announced excellent progress in the experiments with his recent discovery of a method for extracting potash and lithia from the rock formation in the Winnipeg River district. If the process continues a success it may mean important developments for the future.

First Locomotive In West

The first railway locomotive crossed the Red River at Winnipeg just fifty years ago. The original locomotive, long since superannuated, is now a centre of interest in one of Winnipeg's parks.

Aching CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with Putnam's is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

PUTNAM'S

European Travel Much Cheaper

Hotel and Railway Rates Are Lowered On the Continent

European travel is going to be much cheaper this summer according to an announcement from the local offices of the Cunard Steamship Co., Limited. Hotel rates will be lower also. With the world proceeding at a reduced pace and money growing in value daily, the men at the heads of European railroads and hotels realize that the only way of winning the Canadian dollar is by holding out more than a dollar's worth in order to attract it. Consequently, there have been reduced rates for tours in Great Britain and deep cuts in railway and hotel rates throughout the continent. It will be much cheaper to travel this season, the reductions ranging from fifteen to forty per cent. In France it will be possible to ride around daily for two weeks for the sum of \$50.46.

The Norwegian Railways have announced a reduction in fares varying from fifteen to thirty per cent. This condition will last all summer.

The French railways are issuing a coupon for \$1.00 which enables the holder to purchase a railroad pass good for two weeks at \$66.70 for first class and \$35.45 for second class accommodations. This pass will permit the holder to use the French railways at any time within the two weeks specified there being no restriction as to its use. For families there are greater reductions, the cuts reaching from twenty to forty per cent.

On group business Germany is granting twenty-five per cent. reduction for fifteen to fifty passengers and an additional reduction for larger groups.

Many of the hotels will maintain their low winter schedules during the summer.

THE RHYMING OPTIMIST

By Aline Michaels

PRESSED SEA-WEED

Between the yellowed pages of a book

A bit of sea-weed met my hand to-day.

And it had gained in that closed place a look

All attuned to its home of wave and spray.

What once was rosy-red now gray and dim,

What once was lithe with life now stiff and stark.

What once might drift from ocean rim to rim

Shut closely here in an unending dark!

Old time and change, like pages, sometimes close

Upon the inflorescence of a heart,

Turning drab-brown had been glowing rose

While slowly vital essences depart.

Yet even in pressed sea-weed one divine

The lift of foam and ocean's flowing lines!

Many mothers have reason to bless Mother Nature's Work Extremist, because it has relieved the little ones of suffering and made them healthy.

Japan Has Strong Army

Figures On Nation's Military Strength Submitted To League

The Japanese war office has published figures on the nation's military strength which will be submitted to the League of Nations.

The army numbered 231,600 men, including officers, in addition to 2,210 men in the gendarmarie and about 20,000 police in Korea, Formosa and Manchuria.

The aviation branch totalled 623 aeroplanes and eight regiments and organization of two new air regiments was contemplated.

Expect Record Exports

With the sailing of 15 ships, crammed with butter, cheese, wool and other New Zealand products, from Wellington, it was predicted that the present export season would break the record for the country. Three vessels carried a total of 36,000 bales of wool, 800 bales of sheep skins, 56,000 boxes of butter and 28,000 crates of cheese, as well as other cargo. One ship carried the largest wool cargo in a single vessel for many years.

Tommy—Mothers are awful. His Father—Why, Tommy? Tommy—My ears is dirty. His mother washes 'em, and if my ears is clean she whips me for goin' swimmin'."

A library of more than 3,000 manuscripts has been unearthed by Dr. Sven Hedin's expedition at ruins in the Gobi Desert.

How To Lose Fat—Get That Youthful Feeling

Over in Great Britain when a man is feeling "as fit as a fiddle" and looking the "picture of health" they say:—

"HIS GOT THAT KRUCHEN PEELING."

That means he takes his little dose of Kruschen Salts every morning. It's the same in the U.S.A.—in Germany—in Holland—in Australia—in South Africa, for Kruschen Salts are now sold all the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary to healthy life. Take half a teaspoon in a glass of hot water before breakfast every morning, modify your diet and exercise regularly. But don't miss a morning. For Kruschen not only puts and keeps the stomach, liver, kidneys and bowels in a splendid healthy condition, but purifies your blood-stream, and sends new life and activity to every part of your body.

Little Helps For This Week

"I will guide thee with Mine eye."—Psalm xxxi. 8.

Of his high attributes beyond the most.

I thank my God for that Omnipotent eye.

Beneath whose blaze no secret thing can hide.

In His infinitude of being, lo! I bless my God I am not wrecked and tossed.

Upon a sea of doubt, with power to try And hide, somewhere in His immensity.

One single sin out of His reckoning crossed.

For even there—self-conscious of its frailty— Might spring the terror—"If He knew the whole, And tracked the skulking guilt out of its goal,

He could not pardon!" But, or great, or small,

He knows the inmost foldings of my soul.

And knowing utterly, forgives me all! —Margaret J. Preston.

His eye is upon our ways, upon our souls; and we may look into that eye. We know, or may know, on what that eye rests with pleasure, on what it rests with pity, on what it rests with condemnation; and we can, if we will, always do the things that please Him; and can make His good pleasure our constant motive, our rule of duty, our reason of doing and not doing. We can shape ourselves under the eye of God, and He would have us.

—Andrew P. Peabody.

Ancient Cosmetics

Face Paint Used 1,500 Years Ago Much the Same As Used Today

The chemical-pharmaceutical institute of the Frankfurt University has analyzed brown and white face paints found in the vanity box of a Roman woman who lived some 1,500 years ago, and finds that their composition is almost exactly the same as that of modern cosmetics today. The only difference is that the ancient paints contain particles of metal which have since been found to be harmful to the skin. The box was found in a grave of the old Roman Settlement Nida, near Frankfurt.

Alberta Sheep Breeders

Sheep breeders in the Strathmore district are reporting large increases in their flocks this year and several large owners have obtained increases of over 125 per cent. owing to unusually fine weather in March and April.

"Brought Back My Strength"

"Lydia E. Pinkham's Vegetable Compound helped me to regain my strength. I was all run down and very nervous and weak. Now I am able to work without tiring, tired feeling. I first took the Vegetable Compound through the advice of a friend, and it has helped me so highly and I hope my testimony will induce others to take it."—Mrs. William Ouellette, 76 Elm St., Berlin, New Hampshire.

98 out of 100 Women REPORTEDLY Suffer From Lydia E. Pinkham's Vegetable Compound

for CORNS & WARTS
Remove dry skin. Dab on dry corn. After a while corns and warts.

Personal and Local

Miss Verna McDonald left on Wednesday to spend the summer vacation at Stellarton, Nova Scotia.

Mrs. Rose of Creston was a visitor with Mr. and Mrs. F. Celli during the week.

The Ukrainian Labor Temple is holding a flower dance on Wednesday, July 8th.

Mr. and Mrs. George Brown and children left on Thursday for two weeks holidays at Spokane.

Mrs. Louis Sist entertained a number of young people in honor of her daughter Joan's fourth birthday on Tuesday.

Mrs. R. Carson left last week for Fort William and Toronto, after visiting her parents, Mr. and Mrs. G. R. Powell.

The first competition of the Rod and Gun club will be held at South Fork on July 12, of which further particulars will be given.

Mrs. R. J. Roberts arrived from Shotton, Wales, on Tuesday, to join her husband and son, who came earlier in the year.

Miss M. Houston, of the high schools staff, has resigned and left for her home in Lethbridge on Monday evening. Applications are being considered by the Board to fill the vacancy.

Miss Surtee, of the miners hospital, left on Tuesday night for two months holidays in eastern Canada. During her absence her place as cook will be taken by Mrs. Green.

Officers of the miners hospital board are R. Sudworth, chairman; Geo. Evans, secretary; J. Hadley, A. McCulloch, Steve Andrews, J. Lonsbury and W. Kuzik.

The colors in which Portable Remington typewriters are sold are very pleasing. Two tone green, mauve, light blue and red are the principal colors. Call at The Journal office and demonstration of the latest portables will be gladly given.

CLASSIFIED ADVERTISEMENTS

F. A. Hart, Manager

"Bob the Tailor" has moved from the Grand theatre building to the building formerly known as New York Cafe. This gives him increased accommodation for carrying on his business.

Coleman people who saw the baseball game at Fernie in which Angelo Gentile's team played state it was the best game they ever saw in the Pass, and it gave them quite a few thrills.

On Tuesday, July 7, the young people are invited to hike to Corbin. Cars will leave St. Paul's United church at 7 a.m. and the hiking will begin at Crow's Nest. Each person will provide his own eats. Advise Belle Flynn if you intend going in order that arrangements may be made for transportation to Crow's Nest.

Writing with a Remington portable machine is a pleasure. Private or business correspondence can be quickly answered and you have the added facility of obtaining clear carbon copies. Call at The Journal office and see the latest models, on which a reduction in price is being made during July and August.

There were so many people anxious for airplane rides at Fernie on Wednesday, that many were disappointed in not being able to get a trip. Four or five planes were taking up passengers, one a four-passenger machine, the charge being \$2.60 for each adult and \$1.25 for children for a few minutes flight.

Every merchant should use his influence with those wholesalers he buys from to buy Canadian coal. He may think that one raising his voice makes no difference, but if all business men in the Pass towns show wholesalers that they are out to try and help sales by all legitimate power at their command, it certainly does help. If we wish to boost our own businesses we must of necessity boost the sale of coal from the Pass mines, and use our influence wherever possible.
